

UK REACH Enforcement Regulations 2008 No. 2852

The UK regulation No. 2852 of 2008 concerning the registration, evaluation, authorisation, and restriction of chemicals (REACH) is currently in force.

REACH establishes specific duties and obligations on a business in the UK which manufactures or imports a substance or article that includes a “substance of very high concern” (SVHC) in concentrations of more than 0.1% w/w. Substance meeting the criteria of article 57 and those identified in the Authorisation List, according to article 59 (1) of the current regulation, have been published and incorporated into our company procedures accordingly.

Mitsubishi Electric is committed to following the principles of the REACH regulation. The manufacture of environmentally friendly and high-quality products is a core objective for the company.

If you need specific product information, then the Mitsubishi Electric website contains REACH information on each product including REACH substance CAS numbers, and this can be found on the below link.

Once the link opens, select the search button, entre the product number, scroll down to the bottom of the page and select the additional information tab. The REACH data is detailed here: -
