## Introduction to iQ Works2 (Melsoft Navigator) Using iQ-R PLC

Address / Contact: Travellers Lane, Hatfield, Hertfordshire, AL10 8XB

Description	<p>This training course is part of a learning pathway designed to equip you with the knowledge and skills to successfully work the iQ-R range of programmable logic controllers or PLC's. This course is centered around the iQ Works software suite, focusing specifically on the iQ Navigator software product. Participants will engage in the development of a project that includes PLC and GOT HMI applications. They will gain skills in configuring a fundamental multi-hardware platform system and utilizing the shared label database features.</p> <p>The training incorporates the IQ Works software suite along with specialized PLC hardware/software simulation systems and GOT hardware/software simulation systems. This course is based on the IQ-R series of PLCs.</p>
Course target	By the end of this 1 day course delegates should be able to design, develop and manage a multi-hardware platform system with the iQ navigator software.
Target group	This professional development experience is aimed at delegates that have previous Mitsubishi PLC and GOT HMI experience.
Agenda	<p>Over a 1 day period delegates will cover the following modules and topics:</p> <ul style="list-style-type: none"><li>• iQ concepts</li><li>• The Navigator</li><li>• Building a PLC system</li><li>• Building a GOT system</li><li>• Introduction to GX Works PLC software</li><li>• Introduction to GT Designer GOT software</li><li>• Project label database management</li><li>• The PLC program</li><li>• The GOT program</li></ul>
Duration	1 Day
Products and software	Visualisation (Human Machine Interface), PLC, Software
Article number	743375
Participant fee	600.00 GBP
