iQ-R PLC Intermediate (Structured Mode)

Address:

| | This intermediate training course is part of a learning pathway designed to equip you with the knowledge and skills to successfully work the iQ-R range of programmable logic controllers or PLC's. |
|---------------|--|
| | This course offers in-depth training aimed at equipping participants with the skills necessary to |
| Description | effectively leverage the features of GX Works, ultimately improving the efficiency of program |
| | development. It encompasses a variety of techniques for implementing modifications, addressing |
| | both design enhancements and error corrections. Participants will explore PLC features that facilitate |
| | a more streamlined programming process, as well as methods for establishing a coherent structure |
| | and logical flow within their programs. This course uses the Structured mode of program creation. |
| Course target | By the end of the course, delegates should be competent in the following disciplines and demonstrate skills including: |
| | Using features of GX Works to speed up the program creation process |
| | Using features of GX Works to simplify the program modification process |
| | Using features of GX Works to simplify program debugging |
| | Using features of the PLC to speed up the program creation process |
| | Using features of the PLC to help |
| Target group | This professional development experience has been designed for those individuals with an |
| | Introductory level of knowledge and experience of iQ-R PLCs and programming and who want to |
| | develop to an Advanced level. |
| | By the end of the course, delegates should be competent in the following disciplines and demonstrate |
| | skills including: |
| | Hair of at was of OV Wada to an adverted an arrangement of the same of the sam |
| | Using features of GX Works to speed up the program creation process Using features of GX Works to simplify the program modification process. |
| | Using features of GX Works to simplify the program modification process Using features of GX Works to simplify program debugging |
| | Using features of the PLC to speed up the program creation process |
| | Using features of the PLC to help create a program structure |
| Aganda | |
| Agenda | Over a 2 day period delegates will cover the following modules and topics: |
| | |
| | CV Works Help tool |
| | GX Works Help tool Configuration short-cuts |
| | Converting or Rebuilding |
| | Online program change |
| | Finding and Replacing |
| | Program monitoring |
| | • Debugging |
| | |

| | Special Coils and Special Registers Digit Specification Designing structured sequences Reading from a PLC |
|-----------------------|--|
| Duration | 2 Days |
| Products and software | PLC, Software |
| Article number | 743355 |
| Participant fee | 1000.00 GBP |
